Highly skilled Flutter developer with 4+ years of experience in building cross-platform mobile applications. Proven ability to design, develop, and deploy robust, user-friendly, and performant apps. Expertise in state management solutions and version control systems.

SKILLS

Languages: Embedded C, C, C++, Dart, Kotlin, Python, JavaScript (basic)

Framework: Flutter, React Native, Jetpack Compose, and Swift UIKit (native iOS development)

Tools: Git, GitLab, Bitbucket, Android Studio, Xcode, Postman, MQTT, VS Code, Swagger, KeyClock, Flutter Dev Tools, Google project IDX, Blender.

Soft Skills: Project Management, Jira, Agile Methodologies, Scrum, Communication, Teamwork, Problem Solving

Others: SharedPreferences, SQLite, BLoC, Provider, Getx, Firebase, Push notification, Rest API integration, UI/UX Designing. Deployment to Play Store and App Store, Mac OS, Linux & Windows platform expertise, Software Development Life Cycle (SDLC).

EXPERIENCE

Nichi in Software Solution Pvt Ltd, Bengaluru

Senior Software Engineer

| May 2025 - Present

- Lead the architecture, development, and native optimisation of high-performance cross-platform Flutter applications in the e-commerce personalisation and artificial intelligence domains. Leverage **Clean Architecture**, **BLoC state management**, and native platform integrations (Kotlin/Swift) to build secure, scalable, and responsive mobile experiences.

Neel Tech Pvt Ltd, Bengaluru

Software Developer

| Nov 2024 - Apr 2025

- Contributed to the iCent app's Learning Management System by implementing features like slide time tracking, webview zooming, and an audio player for TTS and MP3 files..
- Transformed the feeds section and implemented role-based badges/tags for client visibility.
- The entire web app was made keyboard-accessible, enabling blind students to use the iCent app effectively.

Apex Financial Technology Limited (Finvisage), Bengaluru

Software Developer

| July 2024 - Sept 2024

- Contributed to developing a Financial Risk Management Systems application utilised by financial institutions to optimise their asset, liability, trade, and valuation management processes, thereby minimising financial risks and maximising returns.
- Spearheaded the integration of APIS to facilitate the extraction and visualisation of critical data through graphs and tables, significantly enhancing user comprehension and decision-making capabilities.

Asiczen Technologies, Bhubaneswar

Software Engineer

| April 2022 - July 2024

- Specialising in Iot-based application development, demonstrating proficiency in integrating diverse technologies with

a focus on Flutter, React Native, and ios development using Swift UIKit.

- Successfully engineered and maintained over 25 key features for the company's mobile application, utilising Flutter, Dart, Swift, and other tools, which resulted in a 40% increase in user engagement and a 25% reduction in crash rates
- Designs and deployed four complex applications, including a **Student Tracking System** (Flutter and Firebase & MQTT), a **Cattle Tracking System** (Flutter, BLE & MQTT), **BLE-enabled smart lock** (iOS with Firebase), and **Vehicle Tracking** (React Native), leading to significant improvements in user experience showcasing good understanding of State Management and MVC, MVVM mobile architectures.
- Achieved successful project completion by leading a cross-functional team to deliver a high-profile project ahead of schedule and within budget, receiving recognition for completing a critical project that resulted in a 15% increase in client satisfaction.

PROJECTS

Telenet AI assistant

- **Multi-LLM Integration:** Orchestrated **ChatGPT**, **Claude**, and **Gemini** APIs for task execution; implemented real-time audio/video streaming via **Gemini Live** using WebSockets, Flutter PCM Sound and hardware camera feeds.
- **Background Wake Word Engine:** Integrated **Sherpa-ONNX** for offline "Hey TT" wake-word detection, allowing the voice assistant to launch and process user commands from background and killed states.
- **Enterprise CRM & Contacts Integration:** Designed and implemented a voice-guided contact-saving flow. Queried the **Sansan CRM API** using phone number variants to fetch business card details, pre-populate contact details, and execute native saves upon voice confirmation.
- **Device & Media Automation:** Engineered native intent integrations for **Spotify** (direct URI playback) and **YouTube** (native player with a web-browser fallback), as well as direct database insertions for Calendar events and Alarms.
- **Secure Networking:** Built a custom **Dio HTTP Interceptor** managing proactive token validation and reactive OAuth2 token refresh (401 handling) to guarantee session continuity.

Palette Plaza - E-Commerce application & 3D Personalization App

Android

iOS

- Developed a cross-platform Flutter application using **Clean Architecture** and **BLoC state management** to provide a seamless product personalisation and shopping experience. Designed a high-performance **3D rendering engine** that downloads OBJ/MTL assets in parallel, composites custom user designs onto 3D UV textures using **Dart Isolates** (preventing UI jank), and streams them using an in-app local HTTP server. Personally owned and completed the integration of the **GMO Payment Gateway API**, securing credit card input through client-side **RSA encryption (PointyCastle)** to meet PCI-DSS standards, and designed a robust WebView-based flow to support **3D Secure 2.0 (3DS)** authentication.

iCent - Educational platform

Android

iOS

Web

- It's for helping international students and newcomers acclimate to academic, work, and social life.
- iCent is being used by 100+ colleges and has had 100k+ downloads.
- The iCent app is specifically designed and built for international offices based on the concept of digitalising handbooks and making effective communication. iCent also addresses the need for internationalisation with an underlying framework in place. Any manual and time-consuming operations, such as documentation collection, can be automated as well, thus increasing staff

productivity.

- **Tools Used:** Flutter, Firebase, RESTful APIS, Provider for State Management, Android Studio, Xcode, Postman, BitBucket, Jira, and SDLC.

Finvisage - FRM Application

- This is a Financial Risk Management (FRM) application used by financial institutions to manage their assets, trades and valuations in a way that minimises risk and maximises returns.
- **Tools Used:** Flutter, Firebase, RESTful APIS, Provider for State Management, Android Studio, Xcode, Postman, GitLab, Jira, and SDLC.

AzIkard - Smart GPS Tracking ID Card

- Created a mobile application to enhance the safety and security of individuals across various age groups, including kids, students, employees, and senior citizens. This compact and discreet GPS device is ingeniously designed to fit seamlessly within an ID card, ensuring that it remains inconspicuous while delivering valuable safety features.
- **Tools Used:** Flutter, Firebase, Push Notification, RESTful APIs, Provider, SharedPreferences, Change Notifier packages for Flutter state management, Android Studio, Xcode, Postman, Swagger, KeyClock, GitLab, Jira, Google Maps, SDLC(Software Development Lifecycle).

AzPetra - Lora based Pet / Cattle Tracking

- Developed a mobile application aimed at cattle tracking using LORA and Bluetooth with multiple features such as geofencing, route replay and playing buzzer via Bluetooth for searching the cattle.
- **Tools Used:** Flutter, Dart, FlutterBlue for BLE connection with the device, Firebase, Push Notification, RESTful APIs, Provider, SharedPreferences, Change Notifier packages for flutter state management, Firebase, Android Studio, VS Code, Xcode, Postman, Jira.

AzLock -BLE & wifi enabled Smart Lock

- Developed an iOS application to operate our smart IoT device AzLock via BLE. Implemented OTA through our App, Searching and Connecting to devices via Bluetooth, wifi and completely revamped the UI showcasing proficiency in Swift UIKit, GitLab, Xcode, vim.
- **Tools Used:** Swift UIKit, GitLab, Xcode, vim.

EDUCATION

Masters in Computer Applications (MCA) at **Indira Gandhi Institute of Technology Sarang** C.G.P.A: 8.68 (2019 - 2022)
